

Jace K. Mixon

Software Engineer | Cloud-Native Applications & Distributed Systems
Coral Springs, FL · kaulana.mixon@gmail.com · (954) 849-5273
<https://jacekm7.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience modernizing enterprise applications and delivering scalable cloud-native and distributed systems. Experienced in C#, SQL, REST APIs, CI/CD, Kubernetes, and Azure, with demonstrated success improving application performance and production reliability. Collaborates across product, architecture, security, and engineering teams throughout the software development lifecycle.

EXPERIENCE

JM Family Enterprises <i>Software Engineer</i>	Deerfield Beach, FL September 2022 - Present
- Implemented reusable Bicep modules and AKS deployment configurations used to modernize 51 enterprise applications within a one-year migration program from AWS to Azure. - Developed event-driven integrations using Azure Service Bus and standardized API delivery through Azure API Management across business-critical distributed applications. - Diagnosed application bottlenecks and optimized SQL queries, reducing calculation runtimes by 60% while delivering 20 production enhancements. - Built and maintained CI/CD workflows supporting 55 repositories across 8 production applications in GitHub Enterprise, GitLab, and Azure DevOps. - Debugged lower-environment and production incidents through application monitoring, root-cause analysis, and targeted code and configuration fixes. - Collaborated with business stakeholders, architects, security teams, and engineers to design reusable, performant, and resilient solutions. - Mentored junior developers through code reviews, architecture discussions, and reusable engineering patterns.	

TECHNICAL SKILLS

Languages:	C#, Python, Java, C, JavaScript, SQL
Cloud & Containers:	Azure, AWS, Docker, Azure Kubernetes Service (AKS)
Data, APIs & Integration:	SQL, MongoDB, Azure Service Bus, Postman, Swagger
DevOps:	Bicep, Git, GitHub Enterprise, GitLab, Azure DevOps
AI:	GitHub Copilot, Claude Code

SELECTED PROJECTS

Budget Master <i>MongoDB, Express, React, Node.js, Swagger/OpenAPI</i>
Designed and launched a full-stack budgeting application with REST APIs documented with Swagger/OpenAPI and MongoDB persistence, enabling users to record income and expenses and monitor their financial activity.
Smart Meal Planner <i>SQL, React, Java, Spring Boot API</i>
Created a personal, weekly meal planner using a React frontend and a Java and SQL backend that includes a recipe repository, drag-and-drop schedule, unit conversion, pantry inventory, and generated shopping lists.
Project Everglades <i>TensorFlow, PyTorch, Python, OpenAI</i>
Developed and evaluated reinforcement learning algorithms that achieved a 90% win rate against competing teams' code in Lockheed Martin's Project Everglades strategy simulation.

AWARDS

JM Family Game of Codes Hackathons: 2nd Place, OCR repair-order mobile experience (2022); 3rd Place, AI chatbot assistant (2024).
